SCIENTIFIC RATIONALE

Paediatric Intensive Care is a constantly evolving field, characterized by the specific needs of the paediatric age group and by the complexity and a variety of clinical and organizational issues it encompasses. This multidimensionality demands a highly specialized, interdisciplinary, and a continuously updated approach. Our Congress aims to bring together national and international experts in the field of paediatric intensive care, to address key challenges, highlighting emerging priorities, and discussing the future outlook of intensive care for children. It will be an important opportunity for dialogue, scientific advancement, and professional development, fostering the exchange of experiences and the creation of a network among professionals working in this field.

This meeting is intended for the following healthcare professionals.

- Adult and pediatric intensive care physicians
- Adult and pediatric Anesthesiologists
- Pediatric Emergency Medicine physicians
- Pediatric Residents
- Anesthesiology and Intensive Care Residents
- Critical care and emergency medicine nurses
